

More freedom and productivity for DECT telephones

- Wireless headset for use with DECT telephones¹
- Convenience with mobility – up to 150m range² and a 12-hour talk time
- Sleek, award-winning design
- 2 wearing styles for individual comfort

GN 9120 DG

Enhance your telephoning comfort and enjoy the benefits of having your hands free with the wireless GN 9120 DG headset solution. Get other things done while on the phone and no matter where you are – in the office or any place in the home. Combine your wireless DECT telephone with the GN 9120 DG headset and enjoy full hands-free mobility and optimum sound quality.

Avoid the strain and hassle of balancing your DECT telephone between your shoulder and ear – keep your hands free when you're talking on the phone. Simply register the GN 9120 DG on the base unit of your wireless DECT telephone, and you're set to answer or end calls via the headset's buttons.

You can move within a 150 m range² from the base unit of your wireless DECT telephone, and enjoy the freedom of up to 12 hours talk time. In addition, the GN 9120 DG complies with the most stringent acoustic shock protection standards, eliminating overly-loud sounds while offering truly impressive sound quality.

Flexibility, comfort and design are hallmarks of the GN 9120 DG. The attractive lightweight headset offers you a choice of two comfortable wearing styles – over-the-head or on-the-ear complete with a soft earhook.

¹ For use with GAP-compatible DECT telephones.

² Based on use in standard open environment and dependent on range of specific DECT unit/installation used with.
