Installation

During the installation procedure, please only use the accessories equipped with the switch.

1 Mounting the Switch on a Desk

To install the Switch, please follow the steps:

1) You can place the Switch on a flat desk.

2) Please insert the power adapter carefully to the power socket of the switch, and then connect it properly to a power source through the cable of the switch.

3) Ensure adequate ventilation space around the switch for dissipating heat and air.

Note

1) Please avoid any heavy thing placed on the switch.

2) Make sure the power is off before unplugging the power adapter.

2 Power On

This 8 port PoE switch can be used with DC power supply. Powering on the Switch, it will automatically initialize and its LED indicators will respond as follows:

1) All the LED indicators except PoE ports LED will light synchronously at first, then all of them included Link/Act LED(green), 100Mbps LED (green) and PoE MAX LED (red), will light off at once, which indicates the system initialized well.

2) The Power indicator will light all the time.

Note

If the LED indicators don't respond as described above, please check the power supply and its connection.

Package Contents

1) One 8-port 10/100M PoE Switch

2) One DC Power Adapter

3) One Power cable
