

# SH 338 IP

## Wideband quality with call control

SH 338 IP is a good quality lightweight single-sided wideband headset designed for all-day users working in busy Unified Communications environments. With the focus on managing calls seamlessly by one device, SH 338 IP with integrated call control cable and USB connector offers greater functionality, easy handling and convenience when using a preferred softphone on PC.

SH 338 IP productivity benefits include: Softphone and Microsoft Lync compatibility, unique sound-channelling foam earpads, Sennheiser superior wideband acoustics, balanced-fit adjustable headband, 300° adjustable microphone boom, noise-canceling microphone, and Sennheiser's unique, patented ActiveGard™ acoustic shock protection technology.

### Benefits and Features

- Single-sided comfort wearing style
- Noise-canceling microphone filters out ambient noise so your voice is always clear and easy to understand
- Headband adjustable on both sides for balanced fit
- 300° adjustable microphone boom allows mic to be positioned exactly as required with headset on left or right ear
- Unique foam ear pads channel sound for great wideband audio
- Integrated call control cable with USB connector for connection to PC
- Downloadable HeadSetup PC Software enables seamless management of all call control features for a wide variety of softphones
- ActiveGard™ technology protects you from acoustic shock and sudden sound surges

Product name	SH 338 IP
Art. No.	504178
EAN No.	40 44155 07298 3
UPC No.	6 15104 22011 9
<b>Technical fact</b>	
Wearing style	Headband, monaural (single-sided)
Microphone	Noise-canceling
Frequency response	150 Hz – 6,800 Hz
Distortion	Less than 1%
<b>Speaker</b>	
Impedance	~180 Ω
Frequency response	150 Hz – 6,800 Hz
Sound pressure	Max. 103 dB limited by ActiveGard™

### Accessories included

Acoustic foam ear pad  
Carry bag  
Cable / Clothing clip  
Leatherette ear pad
